- `pip install aider-chat`
- `aider --model ollama/llama3.1:8b-instruct-q4_K_M`

OR

- `python.exe -m pip install aider-chat[browser]`
- `aider --browser --model ollama/llama3.1:8b-instruct-q4_K_M`

Program created

```
Command Prompt - aider --n X + v
(vpy) D:\workspace\20240725_Aider>aider --model ollama/llama3.1:8b-instruct-q4_K_M
No git repo found, create one to track GPT's changes (recommended)? y
Git repository created in the current working directory.
Added .aider* to .gitignore
Model ollama/llama3.1:8b-instruct-q4_K_M: Missing these environment variables:
- OLLAMA_API_BASE
Model ollama/llama3.1:8b-instruct-q4_K_M: Unknown context window size and costs, using sane defaults.
For more info, see: https://aider.chat/docs/llms/warnings.html

Aider v0.45.1
Model: ollama/llama3.1:8b-instruct-q4_K_M with whole edit format
Git repo: .git with 0 files
Repo-map: disabled
Use /help <question> for help, run "aider --help" to see cmd line args

> i wish to create a frontend to able to select multiple area on pdf
I'll create a new file for the frontend functionality.
frontend/src/App.js

import React from 'react';
import { PDFViewer } from '@pdftron/webviewer';

function App() {
  return (
```

Browser mode

The screenshot shows a web browser window at localhost:8501. The interface is split into a left sidebar and a main chat area. The sidebar, titled 'Aider', contains controls for adding files and web pages, resending messages, and clearing history. A yellow warning box in the sidebar states: 'This browser version of aider is experimental. Please share feedback in [GitHub issues](#).' The main chat area displays system information: 'Aider v0.45.1', 'Model: ollama/llama3.1:8b-instruct-q4_K_M with whole edit format', 'Git repo: .git with 2 files', and 'Repo-map: disabled'. Below this is a user message: 'How can I help you?'. The chat history shows 'Added main.py to the chat' and 'Removed main.py from the chat'. At the bottom, there is a text input field with the placeholder 'Say something' and a send button.
